Wedding photography: what we can offer you

(for 2010, Nov 2009)

The photography will be done by Rob and his team personally and includes a wide range of styles: Rob excels at capturing that unique moment and those subtle details, but when needed, Rob will be firmly in control to direct you and your guests to achieve exactly the look you're after.

The photos will be edited and corrected and consequently presented in a high quality A4-sized 'Moments' Coffee Table Book. A selection of retouched and enhanced photos will be put on a webpage for you to view.

Wedding albums are the best way to preserve your memories. That is why Rob Driessen Photography focuses on presenting your treasured photographs in spectacular art albums.

There are two distinctly different album styles to choose from: the Magazine Album and the Fine Art Album. All photographs in your album will be enhanced and retouched to perfection, with just a touch of magic.

Album packages start from \$7650 for six hours of photography and seventy photographs in your album of choice. Six hours will usually allow Rob to photograph your day from the 'pre-ceremony' shots to the start of the reception. The coverage ends before dinner, but may be extended to nine hours to include speeches and first dance. You will also receive a CD-ROM with high resolution proof files.

If the packages don't suit, we can put something together...just for you.
